

# Smartcloud

## Video as a Service

New Zealand's most innovative cloud video service

Smartcloud provides immediate access to the advantages of high quality video communications without the need to invest in expensive hardware, infrastructure and training for internal help desk services all for a single monthly fee.

Our Smartcloud Intelligent Core is unique to New Zealand in that we support H.264 high profile in multipoint calls, providing you high definition at lower bandwidths\*. Smartcloud is the only service in New Zealand that allows federation for Microsoft Lync users, bringing the Microsoft and traditional Video Conferencing environments together.

With Smartcloud VaaS we won't dictate what devices you must purchase, select one of our bundles or let us put together a customer solution for you.

- Hardware
- Installation
- User Training
- Maintenance
- Dedicated trusted advisor
- Full configuration, management and monitoring

If you already have your own equipment, no problem talk to us about bringing them into Smartcloud or perhaps our Smartcare<sup>TM</sup> Managed Services may be more suitable.
